DLD Performance Test

Time: 45 min

Start Time: 2:25 PM End Time: 03:10PM

Please save your file as: ID_Mid_Performance_test

Submit your file in your portal

A Building has 4 floors which share the same water tank for water supply. In order to start the motor, each floor has a designated switch – Ground floor with switch A, 1st floor with switch B, 2nd floor with switch C and 3rd floor with switch D. The motor starts if someone presses the switch from the ground floor or from both 3rd and 2nd floor or from 1st and 3rd floor. For the expression find the truth-table, reduced expression using K-MAP and draw the logic diagram. Also simulate the logic diagram.
